

For Immediate Release

CONAFOR Orders Three Additional Faxitron Systems for Seed Imaging

WHEELING, Illinois (October 22, 2007) – Faxitron X-Ray LLC (Faxitron) today announced that CONAFOR, Mexico's National Forestry Agency, ordered three additional MX-20 digital cabinet x-ray systems for their seed imaging program. The order was received by Lab-Tech, Faxitron's local distributor in Guadalajara, Mexico.

The MX-20 is particularly well suited for seed analysis. Available in both film and digital versions, the MX-20 digital has been the choice of most governmental agencies due to the increased throughput. The MX-20 is available with a 5 x 5 cm or 12 x 12 cm active field of view high resolution digital detector. The small focal spot x-ray tube enables up to 5X geometric magnification.

About Faxitron X-Ray LLC

Faxitron X-Ray LLC is the global leader in cabinet x-ray systems for specimen radiography, research, and NDT applications. With an installed base of over 5,000 systems in medical facilities and scientific and industrial laboratories around the world, Faxitron is the industry standard in cabinet x-ray. For over 30 years, Faxitron has defined cabinet x-ray by developing innovative products to meet the evolving needs of our customers. From film to the latest in digital imaging technology, the company's focus on quality and ease-of-use continues to earn the trust and repeat business of its customers.
